Work Experience

Software Engineer, LinkedIn

Oct '24 – Present

- » Rewrote the search path in Python, dropping median response from 900ms to 110ms for 15M monthly users.
- » Partnered with product to scope and deliver 50 major releases, each behind staged rollouts.
- » Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 12%.
- » Owned the customer-facing API end to end on Java, from schema design through on-call support.

Education and Training

Bachelor, Data Science

Lake Jerry mouth National University | 2021 – 2024

Relevant coursework: Statistical Learning, Data Mining, Natural Language Processing, Experimental Design

Key Skills

Languages: Java, Python, Scala

Frameworks: FastAPI

Data: Redis

Analytics & Design: Tableau

Personal Projects

Match-day predictor

Small model in Redis predicting league results. Beats the naive baseline; still loses to the bookmakers.

Home energy dashboard

Collects meter readings and renders them with Tableau. Mostly an excuse to learn time-series storage properly.

Recipe search engine

Full-text search over a scraped recipe corpus using Java; learned more about ranking than about cooking.

Languages

English – Native
