SUMMARY

16 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: C# and FastAPI.

RELEVANT EXPERIENCE

IBM — Software Engineer

2015–Present | Amyland

- » Cut CI build times by 30% by parallelising the Docker pipeline and caching dependency layers.
- » Rewrote the search path in Next.js, dropping median response from 900ms to 60ms for 6M monthly users.
- » Built a reusable TypeScript component library adopted by 2 product teams, removing months of duplicated work.
- » Partnered with product to scope and deliver 30 major releases, each behind staged rollouts.
- » Led the migration of a legacy monolith to gRPC, taking deployments from fortnightly to 3 per day.

Software Engineer, Ridgeline Analytics

2010–2015 | Castilloview

- » Introduced contract testing with Playwright, lifting coverage from 20% to 85% and cutting integration bugs.
- » Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 15%.
- » Replaced a third-party dependency with an in-house Next.js module, saving \$3k per year in licence fees.
- » Designed and shipped TypeScript services handling 12k requests per minute, cutting p99 latency from 900ms to 180ms.

EDUCATION AND TRAINING

Bachelor, Biology

Johnsonland State University | 2006–2009

TECH STACK

C# • FastAPI • Git • Python • REST APIs • gRPC • Redis • JavaScript • TypeScript • Docker • pytest • Next.js • Databricks • Angular • Spark • Playwright

ACHIEVEMENTS

Graduated with Distinction, 2025

LANGUAGES

English – Bilingual

French – B2

HOBBIES & INTERESTS

Jazz guitar, Trail running
