AI Researcher

PROFESSIONAL PROFILE

12 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Python and Scikit-learn.

EXPERIENCE

AI Researcher, LinkedIn

08/2018 - 02/2026

- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Built an end-to-end training pipeline on Scikit-learn, cutting retraining from days to 6 hours.
- Built the feature store that 4 downstream models now read from, ending duplicated feature logic.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 55%.
- Mentored 4 analysts moving into modelling work, with weekly paper reading and code review.

Applied Scientist

Blue Orbit Labs | 09/2015 - 08/2018

- Developed an NLP classification system in TensorFlow reaching 94% F1, replacing a manual review queue.
- Ran A/B tests across 12 model variants; the winning variant added an estimated \$120k in annual revenue.
- Trained and deployed Scikit-learn models serving 5M predictions per day at under 110ms p95.
- Wrote the team's model documentation and review standard, now required before any production launch.

Ironwood Consulting — Junior Data Scientist

05/2014 - 09/2015

- Productionised demand forecasting models that reduced stock-outs by 25% across 6 regions.
- Cut inference cost by 70% through quantisation, batching and autoscaling on Docker.
- Established offline/online evaluation parity, catching 30 silent regressions before release.

Data Scientist, Cisco

10/2013 - 02/2014

- Migrated ad-hoc notebooks into versioned Hugging Face pipelines with reproducible runs and tracked experiments.
- Lifted recommendation click-through by 15% through feature engineering and retraining cadence in Scikit-learn.
- Represented the team in cross-functional planning with product, design and support.

PROJECTS

Charity chatbot

Built a Hugging Face assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Match-day predictor

Small model in PostgreSQL predicting league results. Beats the naive baseline; still loses to the bookmakers.
