Employment History

Platform Engineer, Dell

2007–2026 | Joshuaberg (On-site)

- Led the migration of a legacy monolith to GraphQL, taking deployments from fortnightly to 50 per day.
- Owned the customer-facing API end to end on REST APIs, from schema design through on-call support.
- Refactored the billing module behind a feature flag, eliminating 60% of recurring production incidents.
- Hardened authentication flows in Scala after a security review, closing 8 findings before audit.

Backend Developer, Cisco

2004–2007 | Richfurt

- Cut CI build times by 22% by parallelising the CI/CD pipeline and caching dependency layers.
- Introduced contract testing with pytest, lifting coverage from 8% to 92% and cutting integration bugs.
- Mentored 15 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.

Full-Stack Developer, Fenwick Digital

2003–2004 | Lake Brian (Remote)

- Rewrote the search path in FastAPI, dropping median response from 450ms to 60ms for 15M monthly users.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 70%.

Uber — Junior Mobile Engineer

2001–2002 | East Luke (Hybrid)

- Set the service-level objectives for 2 services and built the dashboards the team still runs on.
- Built a reusable GraphQL component library adopted by 12 product teams, removing months of duplicated work.
