PROFILE

15 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: PyTorch and Airflow.

CAREER HIGHLIGHTS

- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 25%.
- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.
- Developed an NLP classification system in Spark reaching 94% F1, replacing a manual review queue.

PROFESSIONAL EXPERIENCE

Applied Scientist

Cobalt Applications | Aug 2014 – Now | Coopershire

- Ran A/B tests across 50 model variants; the winning variant added an estimated \$500k in annual revenue.
- Built an end-to-end training pipeline on Spark, cutting retraining from days to 40 hours.
- Built the feature store that 12 downstream models now read from, ending duplicated feature logic.
- Lifted recommendation click-through by 60% through feature engineering and retraining cadence in Spark.
- Established offline/online evaluation parity, catching 6 silent regressions before release.

Nova Tech Group — Machine Learning Engineer

Jan 2012 – May 2014 | Alvinland

- Wrote the team's model documentation and review standard, now required before any production launch.
- Cut inference cost by 22% through quantisation, batching and autoscaling on Docker.
- Mentored 20 analysts moving into modelling work, with weekly paper reading and code review.
- Migrated ad-hoc notebooks into versioned Databricks pipelines with reproducible runs and tracked experiments.

Ridgeline Analytics — Junior Applied Scientist

Jun 2010 – Oct 2011 | Jenniferbury

- Trained and deployed Pandas models serving 20M predictions per day at under 110ms p95.
- Productionised demand forecasting models that reduced stock-outs by 60% across 40 regions.
- Managed stakeholder communication during a major incident, including the post-mortem.
