Alan Downs

Mobile Engineer

Personal Statement

Early-career Mobile Engineer with 1 year in Software Development. Strongest in Git; currently deepening my JavaScript experience through production work rather than tutorials.

Qualifications

Bachelor, Communications

Veronicashire State University | 2024

Relevant coursework: Research Methods, Digital Strategy, Media Theory, Public Relations

Career History

Blue Orbit Labs — Mobile Engineer

January 2025 to February 2026 | Amberfurt (Remote (UK))

- Designed and shipped Spring Boot services handling 12k requests per minute, cutting p99 latency from 600ms to 140ms.
- Cut CI build times by 20% by parallelising the the in-house toolchain pipeline and caching dependency layers.

Open Source

Match-day predictor

Small model in Cypress predicting league results. Beats the naive baseline; still loses to the bookmakers.

Personal finance tracker

Self-hosted spend tracker built with Spring Boot. Deliberately kept the data local rather than using a hosted service.

Home energy dashboard

Collects meter readings and renders them with JavaScript. Mostly an excuse to learn time-series storage properly.

Recognition

Best Team Contribution, 2019

Internal Hackathon Winner, 2019
