PERSONAL STATEMENT

Principal Site Reliability Engineer with 24 years in DevOps/Infrastructure, currently at Blue Orbit Labs. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in Datadog, Terraform and Kubernetes.

ACADEMIC HISTORY

High School

Jeffreyshire High School | 1996 to 2000

TECH STACK

Languages: JavaScript, Python

Frameworks: LangChain

Cloud & DevOps: Datadog, Terraform, Kubernetes, AWS, Azure, GCP, Docker, Prometheus, Linux, CI/CD

Data: Redis, Kafka, Redshift

CAREER HISTORY

Principal Site Reliability Engineer, Blue Orbit Labs

January 2018 to Now | West Brady (Hybrid - 2 days on-site)

- » Designed the multi-region failover strategy and led the game-day exercises that proved it.
- » Wrote the platform team's paved-road documentation, cutting onboarding from weeks to days.
- » Cut container image sizes by 18%, shortening cold starts across the fleet.
- » Introduced infrastructure-as-code with AWS, eliminating manual provisioning entirely.

Cobalt Applications — Site Reliability Engineer

December 2006 to October 2017 | Kellychester (On-site)

- » Ran the on-call rotation for 8 production services, sustaining 99.9% availability.
- » Built observability on Docker so teams could self-serve dashboards instead of filing tickets.
- » Built CI/CD pipelines with Azure, bringing mean time to deploy under 40 minutes.

Platform Engineer, Vantage Point Technologies

June 2005 to November 2006 | Burgesshaven (Hybrid - 2 days on-site)

- » Reduced incident MTTR from 6 hours to under 30 minutes with better alert routing and runbooks.
- » Improved cluster utilisation by 60% through right-sizing and Azure autoscaling policies.

Platform Engineer

Meridian Software | September 2002 to March 2005 | Fowlerborough

- » Hardened Docker environments ahead of SOC 2, closing 3 critical findings.
- » Led the Kubernetes upgrade across 12 clusters with zero customer-visible downtime.

Junior Platform Engineer, Vantage Point Technologies

August 2001 to April 2002 | Amberside

- » Automated 20 manual runbooks, saving an estimated 10 engineer-hours per month.
- » Introduced secret rotation and least-privilege IAM across 6 accounts.

SIDE PROJECTS

Match-day predictor

Small model in Kubernetes predicting league results. Beats the naive baseline; still loses to the bookmakers.

LICENCES & CERTIFICATIONS

Databricks Certified Data Engineer Associate — Databricks, 2017
Certified Information Systems Security Professional (CISSP) — ISC2, 2023

AWS Certified Solutions Architect - Associate — Amazon Web Services, 2017

PERSONAL INTERESTS

Long-distance swimming, Baking, Bouldering, Sailing
