

Lauren Rodriguez

dawnmerritt@example.org – 600-972-0409 – github.com/laurendev

PROFESSIONAL PROFILE

24 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: Next.js and Go.

WORK EXPERIENCE

04/2015 - Present	Lead Full-Stack Developer Fenwick Digital - Partnered with product to scope and deliver 5 major releases, each behind staged rollouts. - Led the migration of a legacy monolith to Next.js, taking deployments from fortnightly to 50 per day. - Hardened authentication flows in gRPC after a security review, closing 40 findings before audit. - Mentored 10 junior engineers, ran weekly design reviews, and authored the team's onboarding guide. - Built a reusable Next.js component library adopted by 4 product teams, removing months of duplicated work.
04/2006 - 03/2015	Mobile Engineer Vantage Point Technologies - Cut CI build times by 25% by parallelising the CI/CD pipeline and caching dependency layers. - Refactored the billing module behind a feature flag, eliminating 15% of recurring production incidents. - Set the service-level objectives for 8 services and built the dashboards the team still runs on. - Designed and shipped Angular services handling 4k requests per minute, cutting p99 latency from 1200ms to 140ms.
05/2003 - 04/2006	Platform Engineer Nova Tech Group - Rewrote the search path in Next.js, dropping median response from 450ms to 40ms for 20M monthly users. - Replaced a third-party dependency with an in-house Next.js module, saving \$2k per year in licence fees. - Owned the customer-facing API end to end on Python, from schema design through on-call support.
11/2001 - 01/2003	Junior Platform Engineer Intel - Introduced contract testing with Python, lifting coverage from 4% to 96% and cutting integration bugs. - Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 15%. - Introduced written design docs and an RFC process, cutting rework late in delivery.
06/2001 - 10/2001	Backend Developer Fenwick Digital - Presented the team's work at an internal engineering forum of 50+ colleagues. - Took over an unowned service, documented it and brought it back under SLO. - Ran retrospectives and drove the follow-up actions to completion, not just to the board.

EDUCATION

Bachelor, Data Science

East Amber State University | 1998 - 2001

TECHNICAL SKILLS

Skill	Experience
Next.js	7 yrs
Go	24 yrs
CI/CD	4 yrs
gRPC	10 yrs
Angular	23 yrs
MySQL	3 yrs
React	8 yrs
Python	1 year
Git	12 yrs
PostgreSQL	18 yrs
JavaScript	12 yrs
Nginx	16 yrs
Jira	7 yrs
Node.js	16 yrs
Databricks	8 yrs
C#	2 yrs

LANGUAGES

English – Native

German – Professional working proficiency

Polish – C1

INTERESTS

Rock climbing, Volunteering at a local coding club
