Professional Summary

16 years in Data Analysis, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: SQL and dbt.

Selected Highlights

- Defined and documented 30 core business metrics in the semantic layer, ending duplicate definitions.
- Presented findings to the executive team monthly, translating analysis into concrete decisions.
- Migrated reporting from spreadsheets to SQL, giving one trusted source of numbers.

Career History

Amber Creek Software — Senior Insights Analyst

2015–Present

- Designed the experiment readouts template now used company-wide.
- Ran cohort analysis that reframed how the business measures activation.
- Built Looker dashboards used daily by 50 stakeholders across three departments.
- Rebuilt the finance forecast with the FP&A; team, improving accuracy by 55%.

Data Engineer

Vantage Point Technologies | 2011–2015

- Partnered with engineering to fix event tracking, recovering 55% of previously lost sessions.
- Trained 15 non-technical colleagues to self-serve, cutting ad-hoc request volume by 18%.
- Modelled pricing scenarios in SQL, supporting a 40% margin improvement.

Business Intelligence Analyst, Lumen Works

2010–2011

- Analysed churn drivers and informed retention work that reduced churn by 18%.
- Built data quality tests in Spark that catch upstream breakages before stakeholders see them.

Data Engineer, Cobalt Applications

2009–2009

- Automated monthly reporting with dbt, saving 10 analyst-hours per cycle.
- Consolidated 6 legacy reports into 5 maintained dashboards.

Academic Background

Bachelor, Mathematics

Whiteview National University | 2005–2009
