

Alyssa Price

Profile

Site Reliability Engineer with 1 year of commercial experience across DevOps/Infrastructure. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: Python, AWS.

Education & Qualifications

Bachelor, Information Systems

Faulknerside University | 2021 — 2024

Graduated with Distinction

Relevant coursework: Enterprise Architecture, Business Process Modelling, IT Governance, Database Design

Work Experience

Silverline Data — Site Reliability Engineer

2025-05 — 2026-05

- Built observability on AWS so teams could self-serve dashboards instead of filing tickets.
- Hardened AWS environments ahead of SOC 2, closing 2 critical findings.
- Led the Kubernetes upgrade across 5 clusters with zero customer-visible downtime.

Technologies

Python (1 yr exp), AWS (1 yr exp), Vue.js (1 yr exp), Cypress (1 yr exp)

Selected Projects

Charity chatbot

Built a Vue.js assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Home energy dashboard

Collects meter readings and renders them with Vue.js. Mostly an excuse to learn time-series storage properly.

Personal finance tracker

Self-hosted spend tracker built with Vue.js. Deliberately kept the data local rather than using a hosted service.
