Profile

8 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: MySQL and PostgreSQL.

Relevant Experience

May '20 – Present	Mobile Engineer Vantage Point Technologies – Refactored the billing module behind a feature flag, eliminating 15% of recurring production incidents. – Replaced a third-party dependency with an in-house Go module, saving \$8k per year in licence fees. – Cut CI build times by 45% by parallelising the Terraform pipeline and caching dependency layers. – Rewrote the search path in Go, dropping median response from 900ms to 60ms for 15M monthly users. – Built a reusable gRPC component library adopted by 40 product teams, removing months of duplicated work.
Sep '18 – May '20	Full-Stack Developer Uber – Partnered with product to scope and deliver 2 major releases, each behind staged rollouts. – Designed and shipped gRPC services handling 3k requests per minute, cutting p99 latency from 600ms to 180ms. – Owned the customer-facing API end to end on C#, from schema design through on-call support. – Set the service-level objectives for 6 services and built the dashboards the team still runs on.
Oct '17 – Sep '18	Junior Software Engineer Meridian Software – Hardened authentication flows in Go after a security review, closing 6 findings before audit. – Mentored 20 junior engineers, ran weekly design reviews, and authored the team's onboarding guide. – Introduced contract testing with the automation framework, lifting coverage from 30% to 82% and cutting integration bugs.

Academic History

Bachelor, Data Science

West Jasonbury University | 2012 – 2016

Key Skills

- MySQL
- PostgreSQL
- C#
- Go
- Node.js
- gRPC
- Tableau
- Angular
- Terraform

Notable Projects

Commute optimiser

Pulls transit APIs and suggests departure times, built on MySQL.

Home energy dashboard

Collects meter readings and renders them with MySQL. Mostly an excuse to learn time-series storage properly.

Languages

English – Bilingual
