Profile

Product/Design graduate with 2 years of hands-on experience, most recently at Uber. Comfortable with Jira and React, and keen to work somewhere with strong code review culture.

Education and Training

Bachelor, Physics

Michaelview State University | 2018–2022

Technical Proficiencies

Jira — Working knowledge

React — Working knowledge

TypeScript — Working knowledge

Tableau — Working knowledge

Confluence — Working knowledge

dbt — Working knowledge

Bash — Working knowledge

Cypress — Working knowledge

Experience

UX Researcher, Uber

2024–2026

- Ran discovery interviews with 5 customers, reshaping the following year's roadmap.
- Redesigned onboarding in React, lifting activation from 10% to 94%.
- Prototyped 10 concepts in TypeScript and killed two early on evidence rather than opinion.
- Ran quarterly roadmap reviews with executive stakeholders and published the trade-offs openly.

Notable Projects

Home energy dashboard

Collects meter readings and renders them with Bash. Mostly an excuse to learn time-series storage properly.

Commute optimiser

Pulls transit APIs and suggests departure times, built on Tableau.

Recipe search engine

Full-text search over a scraped recipe corpus using Cypress; learned more about ranking than about cooking.
