Professional Summary

Full-Stack Developer with 1 year of commercial experience across Software Development. I learn fast, ask a lot of questions, and care about leaving code clearer than I found it. Core tools: C#, Vue.js.

Education

Bachelor, Physics

Armstrongbury Institute of Technology | 2020 – 2024

Relevant coursework: Computational Physics, Thermodynamics, Electromagnetism, Quantum Mechanics

Technical Skills

C# (1 year), Vue.js (1 year), Excel (1 year), MLflow (1 year)

Employment History

Full-Stack Developer, Spotify

Jan 2025 – Aug 2026 | Brooksfurt

- Replaced a third-party dependency with an in-house C# module, saving \$40k per year in licence fees.
- Mentored 12 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 12%.

Side Projects

Charity chatbot

Built a Vue.js assistant for a local charity to answer volunteer questions; retired it once they moved to a supported platform.

Personal finance tracker

Self-hosted spend tracker built with MLflow. Deliberately kept the data local rather than using a hosted service.

Home energy dashboard

Collects meter readings and renders them with C#. Mostly an excuse to learn time-series storage properly.

Languages

English – Bilingual

Hindi – C1

French – C1

Personal Interests

Amateur photography, Woodworking, Baking
