Senior Applied Scientist with 16 years in Data/AI/ML, currently at Blue Orbit Labs. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in LangChain, AWS and Hugging Face.

WORK EXPERIENCE

Senior Applied Scientist, Blue Orbit Labs

2017-02 — Present

- Built an end-to-end training pipeline on Hugging Face, cutting retraining from days to 4 hours.
- Trained and deployed Python models serving 5M predictions per day at under 180ms p95.
- Lifted recommendation click-through by 55% through feature engineering and retraining cadence in Hugging Face.
- Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders.

Oracle — Data Scientist

2012-11 — 2016-12

- Built the feature store that 15 downstream models now read from, ending duplicated feature logic.
- Established offline/online evaluation parity, catching 5 silent regressions before release.
- Wrote the team's model documentation and review standard, now required before any production launch.

Intel — Machine Learning Engineer

2011-04 — 2012-06

- Migrated ad-hoc notebooks into versioned LangChain pipelines with reproducible runs and tracked experiments.
- Developed an NLP classification system in LangChain reaching 92% F1, replacing a manual review queue.

Shopify — Applied Scientist

2009-11 — 2010-11

- Mentored 20 analysts moving into modelling work, with weekly paper reading and code review.
- Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 45%.

Ridgeline Analytics — Junior Data Scientist

2009-01 — 2009-11

- Cut inference cost by 20% through quantisation, batching and autoscaling on AWS.
- Productionised demand forecasting models that reduced stock-outs by 12% across 20 regions.

EDUCATION

Bachelor, Mathematics

East Javier National University | 2006 — 2009
