Pragmatic SDET (4 years in QA/Testing). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Postman, Jira and a lot of conversations with the people who use what we build.

WORK EXPERIENCE

SDET, Silverline Data

2022-05 — Present

- Integrated automated checks into the Docker pipeline, blocking 12 faulty releases.
- Built the defect triage process and reporting the engineering leads still use.
- Set up cross-browser and device coverage in Postman, catching defects staging had missed.
- Drove accessibility coverage from 10% to 88% of core journeys.
