## About Me

9 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: pytest and Python.

## Relevant Experience

|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Oct '21 – Present | <b>Mobile Engineer</b><br>BrightPath Solutions <ul style="list-style-type: none"><li>• Mentored 30 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.</li><li>• Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 55%.</li><li>• Cut CI build times by 22% by parallelising the GCP pipeline and caching dependency layers.</li><li>• Owned the customer-facing API end to end on TypeScript, from schema design through on-call support.</li><li>• Designed and shipped TypeScript services handling 6k requests per minute, cutting p99 latency from 450ms to 110ms.</li></ul> |
| Sep '19 – Oct '21 | <b>Platform Engineer</b><br>Meridian Software <ul style="list-style-type: none"><li>• Hardened authentication flows in gRPC after a security review, closing 3 findings before audit.</li><li>• Led the migration of a legacy monolith to Angular, taking deployments from fortnightly to 4 per day.</li><li>• Replaced a third-party dependency with an in-house Vue.js module, saving \$2k per year in licence fees.</li><li>• Built a reusable Vue.js component library adopted by 15 product teams, removing months of duplicated work.</li></ul>                                                                                                              |
| Aug '17 – Sep '19 | <b>Junior Mobile Engineer</b><br>Amber Creek Software <ul style="list-style-type: none"><li>• Set the service-level objectives for 10 services and built the dashboards the team still runs on.</li><li>• Rewrote the search path in Python, dropping median response from 450ms to 140ms for 3M monthly users.</li><li>• Refactored the billing module behind a feature flag, eliminating 15% of recurring production incidents.</li></ul>                                                                                                                                                                                                                        |

## Education & Qualifications

### Master, Software Engineering

Port Matthewville Institute of Technology | 2016 – 2017

### Bachelor, Software Engineering

Lake John University | 2013 – 2016

## Tech Stack

pytest (1 year), Python (2 years), TypeScript (5 years), gRPC (5 years), Vue.js (1 year), Spring Boot (4 years), Angular (7 years), GraphQL (8 years), GCP (5 years), CI/CD (3 years), Figma (7 years), BigQuery (4 years)

## Outside of Work

Jazz guitar, Urban sketching
