PROFILE

Mobile Engineer with 9 years in Software Development, currently at Uber. I work at the point where architecture meets delivery: setting technical direction, then staying close enough to the code to know whether it held. Strongest in CI/CD, React and FastAPI.

WORK EXPERIENCE

Mobile Engineer — Uber

2021–Present

- Hardened authentication flows in JavaScript after a security review, closing 10 findings before audit.
- Designed and shipped Java services handling 20k requests per minute, cutting p99 latency from 450ms to 40ms.
- Cut CI build times by 60% by parallelising the CI/CD pipeline and caching dependency layers.
- Replaced a third-party dependency with an in-house Java module, saving \$50k per year in licence fees.

Full-Stack Developer — Cobalt Applications

2018–2020

- Owned the customer-facing API end to end on JavaScript, from schema design through on-call support.
- Partnered with product to scope and deliver 5 major releases, each behind staged rollouts.
- Refactored the billing module behind a feature flag, eliminating 40% of recurring production incidents.

Mobile Engineer — Amber Creek Software

2017–2018

- Set the service-level objectives for 5 services and built the dashboards the team still runs on.
- Led the migration of a legacy monolith to React, taking deployments from fortnightly to 50 per day.

Full-Stack Developer — Oracle

2016–2017

- Mentored 3 junior engineers, ran weekly design reviews, and authored the team's onboarding guide.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 25%.

EDUCATION AND TRAINING

Bachelor, Information Systems

Andreville Institute of Technology | 2016

PERSONAL SKILLS

CI/CD (3 years), React (8 years), FastAPI (7 years), JavaScript (5 years), Java (3 years), PostgreSQL (1 year), Git (4 years), Jenkins (7 years), Datadog (6 years), Databricks (1 year)

ADDITIONAL INFORMATION

Certifications

Azure Fundamentals (AZ-900) — Microsoft, 2017
