

FERNANDO THOMAS

tuckerjennifer@example.com – (322)770-2543x1639 – Wendyview

Personal Statement

16 years in Data/AI/ML, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: TensorFlow and Pandas.

Experience

Jul '14 – Feb '26	Applied Scientist IBM - Trained and deployed NumPy models serving 2M predictions per day at under 110ms p95. - Migrated ad-hoc notebooks into versioned Pandas pipelines with reproducible runs and tracked experiments. - Lifted recommendation click-through by 55% through feature engineering and retraining cadence in PyTorch.
Sep '11 – Jul '14	AI Researcher Lumen Works - Translated ambiguous business questions into a modelling roadmap with product and finance stakeholders. - Developed an NLP classification system in PyTorch reaching 90% F1, replacing a manual review queue.
May '10 – Sep '11	MLOps Engineer Vantage Point Technologies Mentored 50 analysts moving into modelling work, with weekly paper reading and code review.
Apr '09 – Dec '09	Machine Learning Engineer Dell Reduced label noise by redesigning the annotation guidelines, improving validation accuracy by 18%.

Academic Background

Bachelor, Electrical Engineering

Arianaberg National University | 2005 – 2009

Skills & Tools

TensorFlow (2 years), Pandas (12 years), Spark (11 years), PyTorch (4 years), Docker (13 years), NumPy (6 years), Snowflake (2 years), AWS (2 years), Databricks (11 years), LangChain (5 years), Java (11 years), Next.js (7 years), MongoDB (15 years), JavaScript (11 years), Postman (16 years)

Language Skills

English – C2
