Eric Ortiz

Junior Platform Engineer

Experience

LinkedIn — Junior Platform Engineer

Jun '25 – Jun '26 | West Angelicamouth

- Partnered with product to scope and deliver 20 major releases, each behind staged rollouts.
- Designed and shipped Python services handling 3k requests per minute, cutting p99 latency from 450ms to 40ms.

Education & Qualifications

Bachelor, Computer Science

East Andrea Institute of Technology | 2021 – 2025

Projects

PostgreSQL utility library

Open-source helper library for PostgreSQL, ~800 GitHub stars. Wrote the docs and handled issue triage.

Recipe search engine

Full-text search over a scraped recipe corpus using PostgreSQL; learned more about ranking than about cooking.

Personal finance tracker

Self-hosted spend tracker built with PostgreSQL. Deliberately kept the data local rather than using a hosted service.
