EXPERIENCE

Summit Digital — Senior Backend Developer

07/2020 - 01/2026

- Cut CI build times by 55% by parallelising the CI/CD pipeline and caching dependency layers.
- Owned the customer-facing API end to end on Next.js, from schema design through on-call support.
- Refactored the billing module behind a feature flag, eliminating 30% of recurring production incidents.

Nova Tech Group — Senior Mobile Engineer

04/2015 - 04/2020

- Partnered with product to scope and deliver 50 major releases, each behind staged rollouts.
- Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 60%.

Junior Software Engineer, Nvidia

07/2008 - 01/2015

- Set the service-level objectives for 10 services and built the dashboards the team still runs on.
