Personal Statement

25 years in Software Development, most of it spent on systems other teams depend on. Comfortable leading technical decisions, pushing back on scope when it matters, and carrying a pager for what I build. Primary tools: PostgreSQL and TypeScript.

Professional Experience

Oct '06 – Jun '26	Platform Engineer Fenwick Digital ■ Built a reusable C# component library adopted by 2 product teams, removing months of duplicated work. ■ Rewrote the search path in GraphQL, dropping median response from 1200ms to 110ms for 50M monthly users. ■ Led the migration of a legacy monolith to React, taking deployments from fortnightly to 20 per day. ■ Partnered with product to scope and deliver 4 major releases, each behind staged rollouts. ■ Set the service-level objectives for 5 services and built the dashboards the team still runs on.
Mar '04 – Oct '06	Platform Engineer Meridian Software ■ Refactored the billing module behind a feature flag, eliminating 70% of recurring production incidents. ■ Hardened authentication flows in React after a security review, closing 30 findings before audit. ■ Drove the team's adoption of trunk-based development, reducing merge conflicts and lead time by 45%. ■ Cut CI build times by 25% by parallelising the Docker pipeline and caching dependency layers.
Nov '02 – Mar '04	Mobile Engineer Silverline Data ■ Introduced contract testing with Java, lifting coverage from 40% to 94% and cutting integration bugs. ■ Mentored 10 junior engineers, ran weekly design reviews, and authored the team's onboarding guide. ■ Owned the customer-facing API end to end on JavaScript, from schema design through on-call support.
Mar '01 – Sep '02	Junior Platform Engineer Cisco ■ Designed and shipped Vue.js services handling 4k requests per minute, cutting p99 latency from 1200ms to 140ms. ■ Replaced a third-party dependency with an in-house REST APIs module, saving \$12k per year in licence fees. ■ Represented the team in cross-functional planning with product, design and support.
