Junior Platform Engineer

CAREER OBJECTIVE

Junior Platform Engineer with 3 years in Software Development, focused on Redis and React. Comfortable owning a feature from discovery through to production support.

RELEVANT EXPERIENCE

Oracle — Junior Platform Engineer

02/2025 - Present

- » Partnered with product to scope and deliver 2 major releases, each behind staged rollouts.
- » Replaced a third-party dependency with an in-house FastAPI module, saving \$12k per year in licence fees.
- » Built a reusable Java component library adopted by 50 product teams, removing months of duplicated work.
- » Rewrote the search path in FastAPI, dropping median response from 780ms to 140ms for 15M monthly users.

Mobile Engineer, Vantage Point Technologies

05/2023 - 10/2024

- » Led the migration of a legacy monolith to React, taking deployments from fortnightly to 2 per day.
- » Refactored the billing module behind a feature flag, eliminating 55% of recurring production incidents.
- » Set the service-level objectives for 12 services and built the dashboards the team still runs on.
