Career History

Junior Mobile Engineer

Summit Digital | Apr '25 – May '26

- Cut CI build times by 45% by parallelising the Docker pipeline and caching dependency layers.
- Owned the customer-facing API end to end on JavaScript, from schema design through on-call support.
- Introduced contract testing with the automation framework, lifting coverage from 6% to 85% and cutting integration bugs.
- Replaced a third-party dependency with an in-house React module, saving \$20k per year in licence fees.

Core Competencies
