Summary

Pragmatic Software Engineer (6 years in Software Development). I enjoy untangling messy systems and leaving them simpler than I found them. Day to day that means Python, REST APIs and a lot of conversations with the people who use what we build.

Career History

Software Engineer, Blue Orbit Labs

2023-12 — 2026-05

- Partnered with product to scope and deliver 2 major releases, each behind staged rollouts.
- Built a reusable Next.js component library adopted by 12 product teams, removing months of duplicated work.
- Refactored the billing module behind a feature flag, eliminating 20% of recurring production incidents.

Platform Engineer, Shopify

2022-04 — 2023-09

- Replaced a third-party dependency with an in-house Next.js module, saving \$40k per year in licence fees.
- Rewrote the search path in Python, dropping median response from 320ms to 140ms for 2M monthly users.

Cisco — Platform Engineer

2019-07 — 2022-02

- Led the migration of a legacy monolith to REST APIs, taking deployments from fortnightly to 15 per day.

Education & Qualifications

Bachelor, Business Administration

Williamsstad State University | 2015 — 2019

Skills & Tools

Python (2 yr exp), REST APIs (3 yr exp), JavaScript (4 yr exp), React (1 yr exp), Next.js (2 yr exp), MySQL (3 yr exp), Django (2 yr exp), Ruby (6 yr exp), Selenium (4 yr exp)
